General Comments:

Reminder: Reminder: Upload COCs to CLPSS once samples have shipped.

10/23 - due to no labs being able to accept the added samples, the Region confirmed that they may be canceled.

10/18 - R10 added water (filtered) Hg, ICP-MS, and ICP-AES as well as changed analytes and added samples to currently scheduled water and soil ICP-MS, ICP-AES, and Hg. ISM currently scheduled at BON.

9/23 - First QC complete. Region confirmed new site info.

Updated scheduled analyses: Added Dissolved water samples for ICP-AES, ICP-MS, Mercury. Aroclor water samples need MA for lower CRQLs at or below 0.5ug/L. If the current MA indicated isn't likely to get bids, 2901.1 would also work.
